Thank you in advance for allowing us to enhance our customer service. Please limit the use of this dedicated Fax number to responses to Written Restrictions.
3. Claims 1-20 are pending.

Election/Restrictions

4. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13 and 17-20, drawn to a method of treating a specific neurological disorder in a human patient which comprises administering to said human patient a composition comprising a polypeptide comprising a sequence substantially equivalent to SEQ ID NO: 2, classified in Class 424, subclass 450, subclass 184.1.
 - II. Claims 14-16, drawn to a method of treating Alzheimer's disease, the method comprising administering to a human subject an effective amount of a composition comprising a polynucleotide having the sequence that is substantially equivalent to SEQ ID NO: 1 and further comprises removing stem cells from a subject, introducing the recombinant expression vector into said stem cells and re-introducing said stem cells into the subject's bone marrow, classified in Class 514, subclass 44.

Art Unit: 1644

The inventions are distinct, each from the other because of the following reasons:

Inventions of Groups I-II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the methods of treating a specific neurological disorder using distinct products (polypeptide versus polynucleotide that differ with respect to their structures) differ with respect to the method steps and endpoints. Therefore, they are patentably distinct.

5. Because these inventions are distinct for the reasons given above and the searches are not co-extensive, restriction for examination purposes as indicated is proper.
6. Irrespective of whichever group the applicant may elect, the applicant is further required under 35 U.S.C. 121 to elect:
 - A) If Group I is elected, the Applicant is required to elect a specific method of treating a **specific neurological disorder** such as the ones recited in claims 8, 9, and 17. These specific neurological disorders such as the ones recited in claims 8, 9, and 17 are patentably distinct because the disorders differ with respect to their etiology and treatment endpoints. Therefore, they are patentably distinct.
 - B) If Group II is elected, the Applicant is required to elect a specific method of treating a **specific neurological disorder** such as the ones recited in claim 14. These specific neurological disorders such as the ones recited in claim 14 are patentably distinct because the disorders differ with respect to their etiology and treatment endpoints. Therefore, they are patentably distinct.
7. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 1, 14 and 17 are generic.

Art Unit: 1644

8. Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.
9. Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 C.F.R. § 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. M.P.E.P. § 809.02(a).
10. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. § 103 of the other invention.
11. Due to the complexity of the claimed invention an oral restriction was not made.
12. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed.
13. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 C.F.R. § 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
